## Aufgaben und Probleme der Tiergärtnerei bei der Erforschung der Lebensäußerungen der Niederen Amnioten (Reptilien)

VON HANS-GÜNTER PETZOLD, Berlin

### Inhalt

1. Einführung. – Der Funktionswandel der Zoologischen Gärten in den verschiedenen Gesellschaftsordnungen – vier Hauptaufgaben moderner Tiergärtnerei im sozialistischen Staat .....	486
2. Kurzer historischer Abriss der Haltung von Amphibien und Reptilien und der damit verbundenen ersten wissenschaftlichen Erkenntnisse .....	493
3. Beobachtungen an und Experimente mit Terrarientieren als integrierende Komponente herpetologischer Forschung – Ergebnisse und Probleme dargestellt an Hand ausgewählter Funktionskreise .....	503
3.1. Funktionskreis der Fortpflanzung .....	504
3.1.1. Sexualdimorphismus .....	506
3.1.2. Maturitätssalter .....	513
3.1.3. Geschlechtererkennung („Sex recognition“) .....	517
3.1.4. Balzverhalten und Kopulation .....	522
3.1.5. Tragzeit und Amphigonia retardata .....	552
3.1.6. Geburt bzw. Eiablage .....	565
3.1.7. Fortpflanzungsperiodizität .....	573
3.1.8. Brutpflege .....	583
3.1.9. Ei- und Gelegedaten .....	611
3.1.10. Inkubationszeit .....	619
3.1.11. Genetische Fragen .....	629
3.2. Funktionskreis der postembryonalen Ontogenie .....	648
3.2.1. Wachstum und Entwicklung .....	648
3.2.2. Färbung und Zeichnung .....	657
3.2.3. Regeneration .....	657
3.2.4. Häutung (Ecdysis) .....	660
3.2.5. „Longevity records“ – zur Frage der Lebenserwartung von (Amphibien und) Reptilien .....	661
3.3. Funktionskreis der Ernährung .....	668
3.3.1. Nahrungssuche und -aufnahme .....	668
3.3.2. Verdauung, Exkretion, Defäkation .....	689
3.3.3. Gewölbildung und Gastrolithen, Keratophagie, Kannibalismus .....	695
4. Kurze Anregungen zu terraristischen Beobachtungen des Reptilienverhaltens aus anderen Funktionskreisen .....	702
5. Zur Relevanz terraristischer Feststellungen für herpetologische Fragen und zur Beeinflussung der Lebensäußerungen durch Terrarienhaltung .....	708
6. Artenschutz-Programme im Zooterrarium und ihre Perspektiven diskutiert an ausgewählten Reptiliengruppen .....	720
7. Schlußbemerkungen .....	741
8. Schrifttum .....	745

S N A K E   R E P O R T   7 2 1

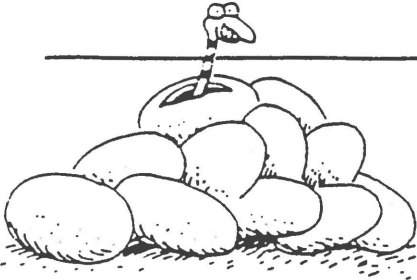

A richly illustrated Snake book with over 700 pages, diagrammes and photos of over 100 species of cameroonian snakes.

It is the result of over 6 years of field studies in the Cameroons and it presents the local herpetofauna with details which were never printed before.

The book can be got from:

R. STUCKI-STIRN  
BURGHALTEN  
3623 TEUFFENTAL  
SWITZERLAND

It will be sent after reception of SFr 80.--

Ernie Wagner will be attending the October meeting of the Dutch Herp Society and can hand carry your snake orders from the United States.

**Hatchling Colubrid snakes include many Pituophis, Elaphe, and Lampropeltis . . . all Mexicana, many triangulums, and several getulus. Several albino forms.**

All hatchlings are guaranteed to be correctly sexed and to thrive, or they will be replaced.

write or call for a price list:

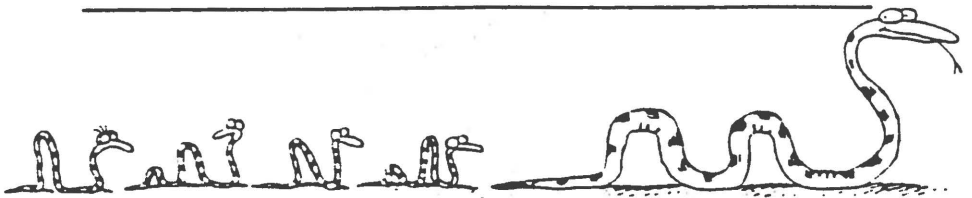

7316 30th N.W., Seattle, Washington 98117 U.S.A.  
(206) 783-8690

---

stainless steel snake probes are available  
for hatchlings, adult Colubrids, and Boidae.

One probe will be included with orders under \$500  
Two probes will be included with orders over \$500  
A set of probes are included in orders over \$1000

FOR SALE

QUALITY CAPTIVE BRED HATCHLINGS

Including : *Drymarchon corais couperi*,  
*Pituophis m. melanoleucus*, *Elaphe sub-*  
*ocularis*, *Elaphe g. guttata* (Carolina  
phase), *Lampropeltis* spp. (*pyromelana*,  
*getulus*, *californiae*, *zonata*, *nigrita*,  
*alterna* (blairs), *hondurensis*, *sinaloae*,  
etc.), *Lichanura* (*Rosyboas*), *Boa c. con-*  
*strictor*, *Morelia s. variegata*, *Liasis*  
*albertisii*.

All the above species, and  
more, are expected late summer  
1984. Please send for full  
list + prices.

We will be visiting Holland  
for the October Meeting, so  
can bring snakes if necessary.

Species wanted : captive bred *Chondro-*  
*python*, *Epicrates c. cenchria*, *Boa con-*  
*strictor ortonii*, *Elaphe situla*.

*"Professional Breeder of Rare Colubrid Snakes"*

Available from private commercial breeder  
of rare colubrid snakes in the U.S.A. are  
the following hatchlings:

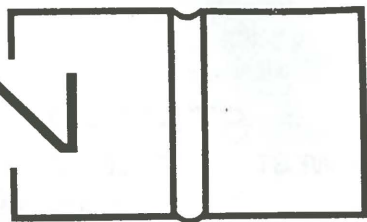

*albino Elaphe obsoleta obsoleta*  
*albino Pituophis melanoleucus affinis*  
*albino Lampropeltis calligaster calligaster*  
*albino Lampropeltis getulus californiae*  
*Lampropeltis getulus nigrilis*  
*Lampropeltis triangulum annulata*  
*Lampropeltis triangulum campbelli*  
*Lampropeltis triangulum hondurensis*  
*Lampropeltis mexicana mexicana*  
*Lampropeltis mexicana greeri*  
*Lampropeltis mexicana thayeri*

All specimens are quality Captive Born  
Hatchlings with both sexes available.

A complete 1984 price list and color  
brochure may be obtained by writing to  
the above address.

Please make inquiries in English only.

# THE BACTERIAL DISEASES OF REPTILES

By Richard Ross, M.D., M.P.H., Director  
Institute for Herpetological Research  
Clinical Assistant Professor of Pediatrics,  
Stanford University School of Medicine  
Research Associate, California  
Academy of Sciences

A new and major contribution to the field of reptile husbandry, this text provides the most current and accurate information on the epidemiology, recognition, control, diagnosis and treatment of the bacterial diseases of reptiles. Identification of simple and resistant forms of the common diseases of reptiles in captivity such as oropharyngeal infections ("mouth rot", or canker), respiratory infections, skin diseases and shell diseases are all included. Selection of correct antibiotics, proper dosage schedules for the new aminoglycoside drugs and other new antibiotics, as well as combination therapy are addressed. A section of color photographs of the diseases discussed is included. Over 130 pages in length, the text is written for the serious herpetologist. A cross index of antibiotics is included for European herpetologists.

The Bacterial Diseases of Reptiles is currently available for \$20.00 per copy, surface mail postage included. Please add \$3.00 for first class overseas airmail postage.

The Institute for Herpetological Research  
PO Box 2227, Stanford, California 94305
