■ INDEX LITTERATURA SERPENTIIUM NO. 16

For several reasons it was not possible to include the index of volume 16 (1996) of *Litteratura Serpentiium* in the last issue of 1996. We apologize for that. For those who have been waiting for this index we have included it as a removable annex in this issue.

■ ASSISTANT EDITORS

Recently Fons Sleypen let us know that unfortunately he was no longer able to continue his translations for *Litteratura Serpentiium*. Hereby we want to thank Fons for all his contributions to our magazine during the past years.

Sadly, again we lose one of our much needed contributors. The editors therefore call to those that want to help our society, to assist in the translations of papers. Especially we need people who are able to translate to English or who can correct for English style and grammar. However translators for other languages are also welcomed. If you feel like helping our society, please
